- Alarm sounds when filter needs replacing
- LCD displays unit status
- Filter comes with filter element, 2 AA batteries, faucet adaptors and filter removal wrench
- 1 year limited warranty

The *PureMax* Countertop Water Filter can turn your kitchen or bathroom faucet into a fountain of safe, chlorine free drinking water whenever you need it. Drink in confidence knowing that the built in filter-life monitor is on the job protecting your family 24 hours a day. The system removes sediment, chlorine, bad tastes and odors by using carbon block filter technology which provides extended life between filter changes. The carbon filter is impregnated with bacteria-static KDF media which means bacteria will not grow in the filter system, providing further protection for you family. The PureMax is portable, so you can take it with you when you move.

This countertop filter is easy to install and operate. Simply connect the tubing to any standard faucet using the supplied adapters, place it on your countertop and attach the diverter valve to the faucet. Turn on the water and pull the diverter valve lever when filtered water is needed.

The built-in monitor lets you know exactly when to change the filter element. An LCD display indicates gallons of remaining water usage, and battery life. An alarm will sound if filter life is exceeded. To change the filter, unscrew the housing with the supplied wrench, replace the old filter element, replace and tighten the housing. Filter life is typically one year.

Specifications: Weight: 5lb. Dimension: 7" L x 7" W x 17"H

Conditions of Use: Water must be microbiologically safe; System pressure, 40 min to 100 max psi; Temperature, 40 to 100° F; PH Range, 3 to 10; Turbidity – less than 1.0 NTU; TDS, 1500 PPM max
