## Accessories by VERTEX

### Ozone Sanitizer System for Vertex Coolers

*Eliminates biological growth in cooler system*

#### Features

- Miniature ozone generator attaches to cooler/dispenser
- Sanitizes by dispersing micro-bubbles of chemical-free ozone into the water of the cooler reservoir
- Ozone quickly disperses and does not alter taste
- Auto-activates for 10-minutes every 8-hours
- Algae, mold and bacteria can't survive ozone
- Frequency of cleaning is reduced

The Ozone Sanitizer produces micro-bubbles of chemical-free ozone that kill bacteria, viruses, mold, and mildew without altering the water's taste. Ozone is an oxidizing agent 1.5 times more powerful than chlorine and effective over a wider range of microorganisms. Ozone kills viruses and bacteria fast and is free of chemical residues. Cleaning frequency and maintenance are also reduced.

#### ORDERING INFORMATION

Factory installed with Cooler

add /OZ to cooler P/N

Leak Detector/Installation

### Leak Detector Stops Water Damage

*Moisture sensor stops leaks in water coolers, refrigerators, coffee makers, dishwashers and more.*

#### Features

- Easy to install Moisture Sensor shuts off water supply and sounds alarm
- Sensor mounts on flat surface up to 3 feet from controller
- Controller fits 1/4 inch plastic or copper tube
- Sensor/Controller powered by 4-AA batteries
- Audio alarm on shut-off or low battery
- Low cost "InsurancePolicy" for higher risk installations

#### Specifications

Solenoid valve 6 volts DC  
Sensor with built-in coin test slot

1-year battery life  
Quick connect fittings to ball valve  
Mounting hardware included
